

Metin Senturk

## Outline

Introduction

Understanding data and databases

Relational Database Model

SQL

Hands On! Working on Adventure Works with SQL.

## About Author

- Data Analyst at Dime Community Bank
- SPU Graduate!

## What do you Need?

In this bootcamp, we will interact with databases. We already have a database setup, all you need is to connect to it.

- SQL Server Management Studio
- Azure Data Studio

## We have a GitHub Repository!

- We will be working with a lot of SQL today. Use the repository to have the bootcamp content and setup your environment!
